

Form 1. Individual Project Proposal Descriptions and Justification

Prepared by: Sam Kilpatrick III
Project Title: Lockable Foyers

Date Prepared: January 6, 2017
Program Area: School Facilities

Project Description: Lockable Foyers are a common security feature to thwart intruders, commonly referred to as “man traps” or “sally port” in police/security lingo. In this building design, entrants would be given access to the lockable foyer first, and then be given access to the building from there. One door of the lockable foyer cannot be unlocked and opened until the opposite door has been closed and locked. In order to provide these lockable foyers at JWL, GFS, and LHS, some walls would need to be constructed, and electronically locking doors installed at strategic locations.

Evaluation Category: RPH

Planning Context: Several security upgrades have been done throughout the district in recent years including installation of security cameras, which would be integral to this project as well. This suggestion came out of the School Safety and Security Committee and was tagged as a possible item to be addressed with the second round of Security Grant funding, which has since been eliminated.

Schedule: Summer work would be necessary for a project of this scope.

Coordination: While not contingent upon other capital projects, maximum effectiveness of the design would be attained in conjunction with a key fob entry system.

Previous Town Meeting Action: No previous Town action.

Project Priority:

 M priority within department/program area

 L Risk of deferring project
