*Assumes \$16/SF

**Assumes the following cost per square foot values. It should be noted that the cost estimates in this report account for the value of the structures only (bricks and sticks) and do not represent total project cost. Project costs associated with land acquisition, site investigation or infrastructure development are also not included. Without in depth site investigation, a generic estimate of these costs is unreliable. The total project cost could vary in the range of thirty to forty percent plus additional costs due to site and infrastructure.
