Fax: 860-513-1483

TABLE OF CONTENTS

1.0	INTRODUCTION.....	1-1
1.1.	Background	1-1
1.2.	Project Scope.....	1-2
1.3.	Existing Wastewater Facilities in Ledyard.....	1-2
2.0	EXISTING CONDITIONS.....	2-1
2.1.	Project Area.....	2-1
2.2.	Zoning	2-1
2.3.	Soils.....	2-1
2.4.	Wetlands.....	2-2
2.5.	Public Water.....	2-3
3.0	WASTEWATER FLOWS	3-1
3.1.	Existing Conditions.....	3-1
3.2.	Future Conditions.....	3-1
3.3.	Total Projected Wastewater Flow	3-3
4.0	EVALUATION OF ALTERNATIVES.....	4-1
4.1.	Wastewater Collection	4-1
4.2.	Wastewater Treatment	4-5
4.3.	Alternative 1 – Highlands Wastewater Treatment Facility	4-7
4.4.	Alternative 2 – On-site Wastewater Treatment with Subsurface Discharge.....	4-8
4.5.	Comparison of Alternatives and Cost Benefit Analysis.....	4-9
5.0	CONCLUSIONS AND RECOMMENDATIONS.....	5-1
5.1.	Recommended Alternative.....	5-1
5.2.	Permitting.....	5-1

5.3. Wastewater Flow Considerations.....5-2

5.4. Phasing of the Project.....5-3

5.5. On-Site Septic Feasibility5-3

5.6. Next Steps5-3

LIST OF TABLES

Table 2-1	Summary of Soil Types in Project Area	2-1
Table 3-1	Summary of Wastewater Flows	3-3
Table 4-1	Planning Level Construction Costs – Alternative 1 (15,000 gpd)	4-7
Table 4-2	Planning Level Construction Costs – Alternative 2	4-9
Table 4-3	Summary of Alternatives	4-10

LIST OF FIGURES

Figure 1	Location Map
Figure 2	Zoning Districts
Figure 3	Soil Data
Figure 4	Wetlands and Floodplains
Figure 5	Public Water Service Areas
Figure 6	Existing Conditions
Figure 7	Conceptual Layout
Figure 8	Alternative 1 – Highlands Wastewater Treatment Facility
Figure 9	Alternative 2 – On-Site Wastewater Treatment with Subsurface Discharge
Figure 10	State Conservation Areas

LIST OF APPENDICES

Appendix A	Connecticut Department of Public Health Recommended Design Flows
Appendix B	Existing Wastewater Flow Estimate
Appendix C	Future Wastewater Flow Estimate
Appendix D	General Information Regarding Prepackaged Wastewater Treatment Facilities and Effluent Disposal
Appendix E	On-Site Subsurface Disposal System Calculations
